

# Ornithology

## Summer 1, 2022

ZOO4472 + ZOO4472L, 4 cr hrs,  
Dr. Hughes.

Lectures focus on topics unique to birds or particularly well studied in birds, including flight, mating systems, and song. Labs are a guided progression through the steps of doing an independent field project, going from finding a question about local birds, through collecting data, to presentation.

You can contact Dr. Hughes at: [colin.hughes@fau.edu](mailto:colin.hughes@fau.edu)

For lab, we spend Fridays, 7:00 to 9:30 AM in the field, and reconvene in Boca (with Air Conditioning!) until 11:40. Lecture follows from 12 to 1:40 PM.
