

SFWC'S POT-LUCK SUPPER AND LEARN EVENT INVITATION

Date: 10th October

Time: 6 – 8:30pm

Where: Pavilion

Come and enjoy great company and food plus learn about the South Florida's wild primate population.

The Dania Beach Vervet Project was started in January of 2014 by Ph.D. candidate, Deborah (Missy) Williams, Florida Atlantic University. The project was started to promote public education, conservation, and awareness about the local free-living vervet monkey population. The project was started to promote public education, conservation, and awareness about the local vervet monkey population. Missy is collecting non-invasive behavioral, ecological, and genetic data. Additionally, she is studying the human-nonhuman interactions to better understand the relationship between the local community and the monkeys. The site will be maintained as a long-term field research center to offer local students the opportunity to gain field experience, in addition to continued research to further understand the monkeys.
